2. **Mine Selection:** Players can generally pick how many mines are hidden within the grid-- varying from just 1 mine up to 24 mines.
3. **The Objective:** Click on tiles one by one. Each safe tile clicked increases the active multiplier.

Understanding the Risk-Reward Dynamic

The mathematics behind the Mines game is uncomplicated: the more mines put on the board, the higher the multiplier for each safe tile discovered. Conversely, positioning fewer mines makes it simpler to find safe tiles, however the payout increments will be https://bitz.io/games/mystery-mines much smaller sized.
