In a typical crash game:

1. Players position a wager before a round starts.
2. A things (typically a rocket, jet, or, in this case, an aircraft) takes off.
3. As the object gains altitude, a multiplier value boosts (e.g., 1.00 x, 1.50 x, 2.00 x, and beyond).
4. Gamers should select the optimum moment to **cash out** before the item randomly "crashes" or disappears.
5. If a gamer squanders effectively, they win their initial stake multiplied by the existing worth. If the item crashes before they cash out, the bet is lost.

Avia Masters takes this cherished mechanic and fine-tunes it with immersive visuals, smooth animations, and an user-friendly user interface that interest both beginners and veterans.
