How the Game Works: Core Mechanics

To really master the skies, a player needs to initially understand the fundamental mechanics of the game. While precise functions can vary slightly depending on the specific platform hosting the game, the universal structure stays consistent.

The Flight Phase

When a round begins, the aircraft raises off the runway and begins its ascent. As it climbs, a multiplier counter begins ticking upward-- starting at 1.00 x and continuing to rise. The longer the flight continues without event, the higher the multiplier goes.

The Descent and Hazards

The skies are rarely clear. Along the flight course, numerous aspects appear that can either increase the player's rating or too soon end the run. These can consist of beneficial tailwinds, fuel boosts, storm clouds, or abrupt altitude drops.

Squandering

The defining mechanic of Avia Masters is the component of risk versus reward. Players must choose the ideal moment to "squander" or protect their development. Wait too long, and a sudden hazard may crash the aircraft, resulting in a lost round. Money out prematurely, and players may miss out on enormous multipliers.

Game Phase Description Gamer Action **Pre-Flight** Setting stakes or preparing the airplane for launch. Place preliminary specifications or begin the round. **Ascent** The plane takes off; multipliers start to climb up. Display the flight course and view the multiplier grow. **Mid-Flight** Navigating threats, collecting rewards, and assessing risk. Decide whether to hang on or protect the present rating. **Resolution** The flight ends either through an effective cash-out or a crash. Collect benefits and prepare for the next round.
