For this factor, expert installation is highly suggested to make sure the system operates properly and automobile warranties are not voided.

Here is a step-by-step summary of what a professional Ghost 2 immobiliser installation entails:

1. Pre-Installation Consultation and Diagnostics

Before touching a single wire, a certified installer will perform a full health check of the car. They will scan for existing fault codes and ensure all dashboard electronic devices are functioning appropriately. The installer will also discuss with the owner where the finest series (PIN code) can be drawn up utilizing the vehicle's specific button design.

2. Disconnecting the Power Supply

Security is vital when working with contemporary automotive electronics. The specialist will detach the automobile's battery to avoid brief circuits, air bag implementation errors, or ECU damage throughout the wiring stage.

3. Finding the CAN-Bus Integration Points

The installer accesses the lorry's CAN-bus network, typically behind the control panel, around the steering column, or near the BCM (Body Control Module). The Ghost 2 unit is then wired directly into this digital information stream. This is where the device receives and sends out directions to immobilize the engine management system.

4. Hiding the Unit

Among the greatest strengths of the Ghost 2 is its diminutive size-- it is approximately the size of a pack of chewing gum. Installers will carefully hide the unit deep within the lorry's loom, wrapping it in factory-style harness tape so that it blends in totally with the original production circuitry. Extremely resistant; no physical wires are cut to obstruct engine functions. **Detection by Thieves** Quickly discovered using basic diagnostic tools or visual examination. Undetected by diagnostics; no radio frequency emissions. **Disarm Method** Different essential fob, RFID tag, or

physical secret. A secret button sequence (PIN code) and/or secure smartphone app. **Relay Theft Protection** Poor (burglars typically steal the secrets or clone the fobs). Outstanding (even with your secrets, the cars and truck can not start without the PIN).
