What is the Aviator Game?

Aviator is a social multiplayer crash game. Unlike conventional fruit machine with spinning reels or table video games with complicated guidelines, Aviator includes an extremely basic concept: a plane removes, and as it ascends, a multiplier increases.

Key Characteristics of Aviator:

- **Multiplier Growth:** The multiplier starts at 1.00 x and can in theory mature to infinity (though useful limits apply).

- **Provably Fair:** The game uses a cryptographic innovation called "Provably Fair" to guarantee 100% fairness of the game results.

Among the most popular tactics involves placing two bets on the exact same round:

- Set the very first bet to auto-cash out at a low multiplier (e.g., 1.50 x) to secure a stable return and cover the cost of both bets.
- Let the second bet trip to a greater multiplier (e.g., 3.00 x or higher) to go after larger profits.

2. The Low-Risk (Conservative) Strategy

- Focus on squandering early, generally between 1.10 x and 1.30 x.
- While the specific wins are little, this method minimizes the frequency of overall losses, permitting players to remain in the game longer.

3. The Martingale System (High Risk)

- Double your bet after every loss, intending to recuperate all previous losses plus an earnings when you finally win.
- *Warning:* This method requires a considerable bankroll and can quickly tire funds if a long losing streak happens.
