This extensive guide explores the mechanics, perk video games, techniques, and overall appeal of this gambling establishment phenomenon.

What is Crazy Time?

At its core, Crazy Time is a live dealership game show developed around a massive, vertically installed spinning wheel. The video game is hosted by an energetic, live presenter who interacts with the audience in real-time. The studio itself is a visual work of art-- a vibrant, vibrant world that feels part-carnival, part-television game show set.

Unlike basic table video games, Crazy Time requires no complex methods or memorization of rules. Players just place a wager on where they think the flapper will stop on the wheel. However, the inclusion of a Top Slot above the primary wheel and four unique perk games includes layers of excitement and unpredictability.

The Anatomy of the Crazy Time Wheel

The 54-segment wheel features numbers and bonus rounds. Understanding the design of the wheel is the primary step for any player seeking to dive into the action.

Wheel Segment Payout/ Function Number of Segments on Wheel **1** Pays 1:1 21 **2** Pays 2:1 13 **5** Pays 5:1 7 **10** Pays 10:1 4 **Coin Flip** Triggers Bonus Round 4 **Cash Hunt** Activates Bonus Round 2 **Pachinko** Triggers Bonus Round 2 **Crazy Time** Triggers Bonus Round 1

As seen in the table above, the lower-paying numbers (1 and 2) appear most often, while the perk games are much rarer, making them the ultimate targets for players throughout a session.

The Top Slot Feature

Before each and every single spin of the main wheel, a two-reel fruit machine positioned straight above the wheel-- called the **Top Slot**-- spins simultaneously.

- **Reel 1:** Displays one of the wheel sections (a number or a bonus game).
- **Reel 2:** Displays a multiplier value (ranging from 2x as much as 50x).

If the sign on the very first reel aligns horizontally with the multiplier on the second reel, that multiplier *Bet Crazy Time* is applied to the matching section for that spin. If the main wheel lands on that specific section, any wins or bonus offer round payouts are quickly boosted by the multiplier. This feature can result in huge win potentials, specifically when combined with the game's high-tier bonus offer rounds.

Dive Into the Four Crazy Time Bonus Rounds

The piece de resistance of Crazy Time is unquestionably its 4 perk rounds. Set off when the wheel stops on their respective sections, these mini-games transportation players away from the primary wheel into immersive, interactive augmented reality worlds.

1. Coin Flip

The most basic of the four bonus rounds. A coin with a red side and a blue side is turned by a mechanical flippers or the presenter.

- Each side is appointed a random multiplier before the flip.
- Gamers win the multiplier connected with whichever color deals with up when the coin lands.
- If multipliers are low, a "Rescue Flip" can often be activated, providing players a 2nd opportunity at higher values.

2. Money Hunt

This perk round is a virtual shooting gallery displayed on an enormous screen including 108 random multipliers.

- The multipliers are concealed behind various symbols (like a cactus, a target, a chef's hat, and so on).
- Players use a crosshair to aim and shoot at one picked symbol before the timer runs out.
- When time expires, the covert multipliers are revealed, and gamers get the multiplier connected to their picked spot.

3. Pachinko

Influenced by the conventional Japanese arcade video game, Pachinko features a glowing wall filled with pegs.

- The presenter drops a puck from the top of the board.
- The puck bounces randomly down through the pegs up until it lands in one of the multiplier zones at the bottom.
- If the puck arrive at a "DOUBLE" worth, all multipliers at the bottom of the board double, and the puck is dropped again, raising the stakes substantially.

4. Crazy Time

The holy grail of the video game. When set off, the host opens a red door that leads into a dynamic, surreal virtual world including a massive, 64-segment mega wheel.

- Players should choose one of 3 flappers: **Green**, **Blue**, or **Yellow**.
- The host spins the wheel, and whichever segment the selected flapper points to is the winner.
- Segments include multipliers as well as **DOUBLE** and **TRIPLE** worths. If a flapper hits a double or triple, all multipliers on the wheel are multiplied accordingly, and the wheel spins once again. This can cause astronomical payouts, capping out at an optimum win of 20,000 x the gamer's stake.
