2. **Select Difficulty:** Most variations of Towers allow gamers to choose a problem setting (e.g., Easy, Medium, Hard, Expert). This alters the grid size and the risk-to-reward ratio.
3. **Make the First Move:** The gamer clicks among the tiles on the bottom row.
4. **Ascend or Cash Out:**
 - If a safe tile is exposed, the multiplier goes up. The gamer can then select to **cash out** and collect their jackpots or continue to the next row for a greater payment.
 - If a trap is revealed, the game ends immediately, and the bet is lost.
