The primary goal is easy yet exceptionally tough: introduce the airplane, browse through the skies, gather multipliers and fuel increases, and squander-- or reach the destination-- before the unavoidable takes place. 2. Utilizing the Auto-Cashout Feature

Human feeling-- particularly greed and panic-- is a pilot's worst opponent. Setting a predefined auto-cashout limit takes the feeling out of the equation. Pick a target before the engine roars to life, and let the system perform the landing.

3. Bankroll and Resource Management

Dealing with every session with a set limit avoids careless decision-making. If a series of flights ends prematurely due to unforeseen weather risks, taking a break is frequently the most intelligent tactical move.
