As you reveal safe tiles, the number of remaining tiles reduces while the number of mines remains constant. This develops a "snowball" effect where the danger of losing your whole stake increases exponentially with every move.

How Mystery Modifiers Work

Mystery events are usually governed by a Random Number Generator (RNG). Common modifiers consist of:

- **The Multiplier Boost:** Occurs when a gamer hits a "Mystery Tile," scaling the present payout by 1.5 x to 5x.
- **The Mine Reset:** A devastating event where the game reshuffles the mines, possibly positioning a mine straight under the next tile the player meant to click.
- **The Shield:** A one-time safeguard that takes in the effect of a mine, permitting the round to continue.

2. **Handle Mine Density:** Choosing 1 mine produces an extremely low roi per tile. Picking a lot of (e.g., 10-15) makes the game essentially a coin turn. Go for a "sweet area" of 3 to 5 mines for a balance of threat and reward.
3. **Capitalize on Volatility:** If the game features a specific "Mystery Bonus," increase your bet size a little when you feel the machine is "due" for a modifier, but always revert to your base stake immediately after.
