Plinko Crypto is a digital version of the standard gambling establishment and game-show game, adapted specifically for online gambling establishments that accept cryptocurrencies like Bitcoin (BTC), Ethereum (ETH), Tether (GBPT), and Litecoin (LTC).

At its core, the game is extremely easy:

1. The gamer sets their bet amount and drops a ball (or "puck") from the top of a triangular grid filled with pegs.
2. As the ball falls, it bounces randomly off the pegs.
3. It eventually lands in among the slots at the bottom, each bring a different multiplier value.
4. The player's payout is calculated by multiplying their original bet by the multiplier of the slot where the ball lands.

Unlike skill-based games like poker, Plinko is a game of pure opportunity. However, the rise of "Provably Fair" [plinko game bitcoin](#) innovation in crypto gambling establishments has offered players a level of transparency that traditional online gambling merely can not match.
