When observing skilled individuals, numerous common wagering approaches emerge:

- **The Bonus Chaser:** Placing wagers exclusively or greatly on the four perk rounds (Coin Flip, Cash Hunt, Pachinko, and Crazy Time). This style accepts the threat of frequent droughts in exchange for the chance to get involved in the game's highest-paying interactive features.
- **The Coverage Strategy:** Spreading bets across multiple numbers and perk rounds at the same time. This makes sure that the player strikes *something* on a huge bulk of spins, though the cost of covering multiple sections can eat into the net revenue of smaller sized wins.

The Role of the Top Slot

Adding another layer of excitement-- and tactical consideration-- is the **Top Slot**. Found straight above the primary cash wheel, this two-reel slot spins all at once with each and every single round of the game.

1. **Reel 1** screens one of the wagering sections (a number or a perk video game).
2. **Reel 2** display screens a multiplier (ranging from 2x up to 50x).

If the two reels align horizontally to form a match, a multiplier is applied to that particular bet or bonus offer round for the upcoming spin. If that segment wins, the payment is improved accordingly.

- **For numbers:** The standard payout is multiplied straight (e.g., a winning '5' struck with a 10x Top Slot multiplier results in a 50:1 payout).
- **For reward rounds:** The multiplier is carried into the bonus video game, immediately improving the standard worths of all the segments or multipliers inside that mini-game.
