To open a case, players need to purchase a **Case Key** from the in-game shop or the Steam market. The secret is taken in upon usage, and the outcome is a random skin figured out by a complicated probability algorithm.

Every skin inside a case comes from a specific rarity tier. These tiers determine the possibility of getting the item and its prospective worth.

Pink	Minimal Wear Five-SeveN	0.64%	Covert
Red	Factory New AWP	0.26%	Rare Special Item

How the Opening Mechanic Works

When a player clicks "Unlock," the video game produces a random number. This number associates to a particular product within the case's swimming pool.

Float Value & StatTrak

An essential consider identifying a skin's value is its **Float Value**. This is a number in between 0 and 1 that represents the wear and tear of the weapon:

- **Factory New (FN):** 0.00 - 0.07
- **Very Little Wear (MW):** 0.07 - 0.15

- **Battle-Scarred (BS):** 0.45 - 1.00

In addition, some skins include a **StatTrak™** counter, tracking the variety of kills made with that weapon. StatTrak variations are usually more expensive than their standard counterparts.
