The Economics: Active vs. Rare Drop Pools

Valve maintains two distinct drop pools for weapon cases: the **Active Pool** and the **Rare (or Discontinued) Pool**.

- **Active Drop Pool:** These are cases presently dropping frequently to players who are playing the video game. Since supply is high and continuously created, these cases are usually economical (typically costing just a couple of cents).

- **Rare Drop Pool:** These are older cases that have been turned out of the active drop system. While they still drop occasionally at the end of a match, the drop rate is greatly lower (estimated at around 1% of the typical drop rate). Due to the fact that supply is finite, these cases can appreciate considerably in worth gradually.
