If a player squanders effectively, they win their original bet increased by the current value on the screen. Nevertheless, if the game crashes before they struck the cash-out button, the bet is lost entirely.

The unpredictability is what drives the gameplay. A round may crash almost quickly at 1.01 x, or it might climb into the thousands before stopping. Since the rounds last anywhere from a couple of seconds to less than a minute, the speed is ruthless, using immediate gratification (or instant heartbreak).

3. **The Climb:** As the multiplier increases, possible winnings increase. Tension constructs as players see the numbers climb, weighing their greed versus their fear of losing.
