The Gameplay Loop

1. **Deposit:** The player deposits CS2 skins to get site balance.
2. **Place Bets:** A countdown timer (generally 15 to 30 seconds) starts. Throughout this time, players put their preferred coin amounts on Red, Black, Green, or particular number ranges.
3. **The Spin:** Once wagering closes, the digital wheel spins.

- **The Martingale System:** This is a progression-based method where players double their bet after every loss. The theory is that a single win will recuperate all previous losses plus an earnings equal to the original stake.
- **The Paroli System:** The inverse of Martingale, this method includes doubling the bet after every *win*. It permits players to capitalize on winning streaks while restricting losses throughout cold spells.
- **The D'Alembert System:** A more conservative approach where gamers increase their bet by one unit after a loss and decrease it by one unit after a win. This decreases the danger of quick bankroll depletion.

A Word of Caution: No system can get rid of the intrinsic home edge. Progressive techniques like Martingale can cause disastrous losses if a gamer hits a long losing streak or reaches the platform's maximum bet limitation.
