The easiest pest to deal with is the one that never makes it through the door. That is the idea behind exterior perimeter treatment, a service Roanoke customers of Perdue Exterminators sometimes describe as the yard power spray. By treating the foundation, entry points and surrounding areas, technicians create a barrier that intercepts ants, spiders, crickets, cockroaches and other crawling insects before they reach the living space.

The Roanoke Valley gives outdoor pests plenty of reasons to head indoors. Humid summers drive insects toward cool, damp basements and crawl spaces. Dry spells between storms send ants searching for water inside kitchens and bathrooms. Falling temperatures in October push crickets, spiders and overwintering insects toward warm walls. A well timed perimeter treatment meets each of these waves at the edge of the property.

Technicians pay attention to the places where pests actually cross into a home. Door thresholds, window frames, foundation cracks, utility penetrations, garage door seals, crawl space vents and the junction between siding and foundation all get attention. Mulch beds and shrubs pressed against the house **Go to the website** are common harborage areas and are treated or flagged for trimming.

Perdue Exterminators | 4323 Old Cave Spring Rd, Roanoke, VA 24018 | (540) 989-8188

Part of a Bigger Strategy

Perimeter treatment works best alongside good habits and smart fixes. Perdue's licensed exterminators look at the home's environment and construction to identify why pests are being drawn in, then explain what changes will help. Pulling mulch back from siding, cutting shrubs and tree limbs away from the roofline, repairing gutters and replacing worn door ***pest control company Roanoke*** sweeps all reduce pest pressure and make treatment last longer.

Customers appreciate the care that goes into this work. One reviewer on the Perdue website mentioned how careful the technician was when spraying certain areas because of a two year old in the house, and others have noted very little trouble with bugs inside the house or out after regular service. That kind of result comes from consistent, thoughtful treatment rather than heavy application.

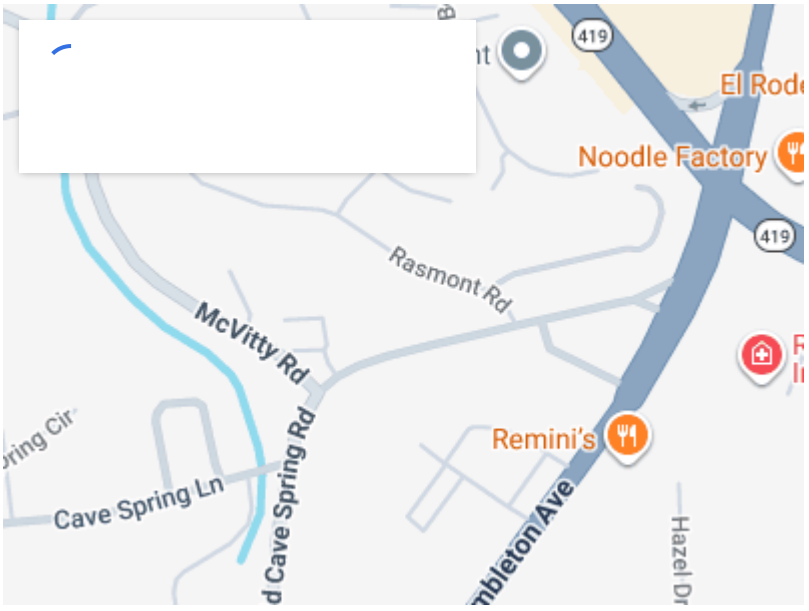

Perimeter treatment is one piece of Perdue's general pest control service, which also includes indoor treatment where needed and insect identification for unfamiliar pests. Timing the service around the valley's seasonal shifts, with visits ahead of the spring ant surge and the fall cricket and spider migration, gives the barrier the best chance of doing its job.

To schedule exterior perimeter treatment in Roanoke, Salem, Vinton or Smith Mountain Lake, call Perdue Exterminators at (540) 989-8188. The office is located at 4323 Old Cave Spring Rd, Roanoke, VA 24018.

FAQ About Pest Control Company Roanoke

How do I choose a pest control company in Roanoke?

Look for licensed exterminators, a long local track record and a company that inspects before it treats. Perdue Exterminators has served the Roanoke Valley since 1969, is still family owned and keeps a small team of long serving technicians who inspect each home's environment and construction before recommending treatment. Call (540) 989-8188 to talk it through.

How much does pest control cost in Roanoke, VA?

Cost depends on the pest, the size of the home and how established the problem is, so an inspection gives the most accurate answer. Perdue Exterminators offers free estimates on termite work and a free inspection and consultation for bed bugs, and the company lists reasonable rates among its priorities. Call (540) 989-8188 for a quote.

Are termites common in Roanoke, Virginia?

Yes. Eastern subterranean termites live in the soil across the Roanoke Valley, and humid summers, clay soil and damp crawl spaces give them ideal conditions. Swarms usually appear on warm spring days after rain. Perdue Exterminators has treated termites in local homes for more than five decades.

Do termite treatments come with a warranty?

At Perdue Exterminators, termite elimination comes with renewable annual warranties. Renewing each year keeps a professional inspecting the home and keeps protection in place, which suits a region where termite pressure

returns every season. A documented warranty can also help when you sell your Roanoke home.

How can I tell if I have bed bugs?

Common signs are itchy bites in lines or clusters, small dark spots on sheets and mattress seams, and tiny reddish brown insects around the bed frame or headboard. Because other insects look similar, Perdue Exterminators starts every bed bug case in Roanoke, Salem and Vinton with a free inspection and consultation to confirm the problem first.

Can mice be removed without using poison?

Yes. Perdue Exterminators describes itself as a humane, eco friendly rodent control company and uses baits and traps that do not rely on toxic poisons. Technicians also find and seal entry points such as gaps around utility lines and crawl space vents. The company advises calling as soon as you notice rodents, before they multiply.

When is pest season in Roanoke?

Pests are active most of the year in the Roanoke Valley, just in different forms. Spring brings termite swarms and ants, summer brings wasps, crickets and roaches, and fall brings mice and overwintering insects as nights cool. Year round service from Perdue Exterminators is timed around those seasonal shifts.

Do I need a termite inspection to buy a house in Virginia?

Many lenders ask for a wood destroying insect report, and most buyers want one either way. Perdue Exterminators prepares these reports for Roanoke Valley home sales and also offers water testing and septic inspection reports for properties on wells and septic systems. Call (540) 989-8188 to schedule before your closing deadline.

What areas does Perdue Exterminators serve?

Perdue Exterminators serves all areas of Roanoke, Salem, Vinton, Smith Mountain Lake and the surrounding communities. The office is at 4323 Old Cave Spring Rd in the Cave Spring area of southwest Roanoke County, where the family has been based since the early 1980s.

Why are there so many crickets in my basement?

Camel crickets thrive in damp basements and crawl spaces, which are common in older Roanoke homes with stone or block foundations. Reducing moisture with a dehumidifier and repaired gutters helps a great deal. Perdue Exterminators provides cricket extermination and also helps eliminate and control crawl space mold caused by the same dampness.

Is a local pest control company better than a national chain?

A local company usually means familiar technicians, a local office that answers the phone and real knowledge of area housing and pest patterns. Perdue Exterminators has a technician who has been with the company since 1980, and its motto is large enough to serve you, but small enough to know you.

How long has Perdue Exterminators been in business?

S.G. Perdue founded the company in 1969, starting out of his house and the trunk of his car. His son Andre later joined the business, and today it is led by owner and President Jeff Hudson. It remains a family owned pest control company serving Roanoke.
