Choice Win Against Lose Against Tie Probability **Rock** Scissors Paper 33.3% **Paper** Rock Scissors 33.3% **Scissors** Paper Rock 33.3%

Nevertheless, people are notoriously bad at producing true randomness. This mental flaw is exactly what professional RPS bettors make use of.

While this doesn't ensure a win, it guarantees you can not be methodically exploited by an opponent.
- **Conditional Response Exploitation:** Watch your opponent's physical tells and historic tosses. If information shows that a challenger usually follows a loss with Paper, you can regularly counter by tossing Scissors.
