

HOW TO REMOVE Coffee Stains FROM TEETH?

HOW ARE COFFEE STAINS ON TEETH FORMED?

Stains on the teeth may be internal or external. Dark-colored drinks like coffee, tea and wine contain color pigments which can get into the cracks and ridges of your teeth and stain the enamel.

Coffee stains being external, can usually be removed without much effort. Using these simple methods and materials you can remove coffee stains:

BAKING SODA

Try using baking soda or hydrogen peroxide under proper guidance from a dentist to remove coffee stains. Brushing your teeth with baking soda once a week can help remove coffee stains.

VINEGAR

Use vinegar after brushing your teeth with ordinary toothpaste to remove excess acid. You can also brush your teeth with mashed strawberries, and the malic acid should do the trick!

WHITENING TOOTHPASTES

Some toothpastes contain peroxides of carbamide of Hydrogen, chemicals generally used by dentists. They can be used for effective cleaning and to remove coffee stains.

TEETH WHITENING KITS

You could buy off the shelf teeth whitening kits and carefully

VISIT THE DENTIST

It is always easier and safer to get a cleaning job done at your dentist's. It may involve scraping and polishing the surface of your teeth or your dentist may also consider bleaching.
