When opened, the case yields a single random item-- a skin for a firearm, a sticker, a glove, or an unique "Contraband" item. The rarity and float value (wear) of the product are identified by a set probability table.

Cases initially appeared in 2013 and have actually considering that multiplied into dozens of distinct **cs2 cases** versions, each connected to a specific collection or operation. Their real-world worth is driven by supply and demand on the Steam Community Market, where uncommon skins can fetch hundreds and even countless dollars.

2. How Case Opening Works

1. **Purchase a case**-- Available in the in-game "Items" tab or on the Steam Store.
2. **Buy a key**-- Each case requires a specific key (e.g., the CS: GO Case Key).
