

Katy TX Plumbing Hard Water Effects Gal Plumbing Industries Solutions The water that flows through Katy, TX taps carries a higher mineral content than many homeowners from other regions are accustomed to. The Houston area water supply, which draws from both underground aquifers and treated surface water, contains calcium and magnesium at levels that classify it as moderately to significantly hard depending on the specific supply area. This mineral content has practical effects on plumbing systems, appliances, and fixtures that accumulate over years of use. Inside tank water heaters, hard water minerals precipitate out and settle as sediment on the bottom of the tank, gradually reducing the unit's efficiency and shortening its working life. Tankless water heaters are not immune either; mineral scale can build up inside the heat exchanger coils and restrict flow if the unit is not flushed periodically. Gal Plumbing Industries LLC offers water heater flushing service in Katy specifically to address this issue, with a current promotional price of \$185 for tankless flush service. Hard water also takes a toll on faucet aerators, showerheads, and fixture valves, where mineral deposits accumulate and restrict flow or jam moving parts. Homeowners in Katy who notice reduced pressure from a single fixture that is otherwise fed by adequate supply pressure often find that mineral buildup at the aerator is the cause, and the solution [Plumber Katy TX](#) is cleaning or replacement of the affected component rather than a supply line investigation.

Gal Plumbing Industries LLC | 2034 Oakwell Ln, Katy, TX 77449 | +18329061141

Whole-house water softeners are an option for Katy homeowners who want to address the hard water issue at the source rather than managing its effects fixture by fixture. Gal Plumbing Industries can advise on water softener installation and connect customers with the right equipment for their household size and water usage. For plumbing service that accounts for Katy's water conditions, call Gal Plumbing Industries LLC at +18329061141. Located at 2034 Oakwell Ln, Katy, TX 77449.
